

for Chemical Containment

After coatings that offer genuine chemical resistance for more than a few minutes?
Are you sick of constant coating maintenance or replacement?
Wouldn't you like a range of products that could do the job right the first time?

WHY JAXXON?

- ✔ Solventless, odourless products free from the hazards typically used in heavy-duty products.
- ✔ Excellent all-round resistance to most common industrial chemicals, including up to 98% sulphuric acid.
- ✔ Range of chemically resistant products, including mortar systems for re-building damaged concrete. Ideal for wastewater plants, acid bunds, tanks etc.
- ✔ Coatings can be applied in wet or dry, cold or hot conditions, meaning shut down periods are short and predictable. Get it right the first time!
- ✔ Proven track record of performance in chemical containment for over 10 years. Don't fall for the cheaper options that fail within 6 months (or less)!

“ The installation is now over 18 months old...the driveway area has shown no signs of damage from the heavy trucks and the tank bund looks as good as the day it was painted. ”

Craig Hughes, Project Manager, Dioxide Pacific
