

for Prisons

Are the surfaces in your facility durable, yet easy to clean and repair?

Do inmates need to be shifted every time hazardous coatings are used?

Do large projects run overtime because of unfavourable weather conditions?

WHY JAXXON?

- ✔ Solventless, odourless products free from hazards that force prisoners and staff to be removed during application.
- ✔ Extremely low VOC emissions - no concerns about long-term "outgassing" in confined cells.
- ✔ Durable, water-resistant, seamless floor and wall coatings that can be easily patch repaired.
- ✔ Coatings can be applied in wet or dry, cold or hot conditions, meaning shut downs are predictable with no costly delays (work was even carried out in the snow during the Risdon Prison project).
- ✔ Risdon Prison project in service for almost 10 years.
