

## Case History

### PROJECT SUMMARY

<b>Client</b>	Lavender Composites
<b>Location</b>	Wacol, Queensland
<b>Colour</b>	Light Grey (N35)
<b>Area</b>	500m <sup>2</sup>
<b>Installer</b>	Lavender CE

### COMMENTS

- Lavender Composites had outgrown their previous commercial building and were looking to move into a brand new, larger facility on the other side of town.
- As a manufacturer of composite materials that handled resins and other liquids, they were keen to put down an easy-to-clean, stain-proof floor that would protect the new concrete from spills as well as traffic wear and tear.
- This type of environment is perfectly suited to the standard Resin Guard™ system and, as they had experience applying resins, the owner Rudy and his team were able to carry out the 500m<sup>2</sup> installation themselves.
