

## Case History

### PROJECT SUMMARY

<b>Client</b>	Xstrata Zinc
<b>Location</b>	Mt. Isa, Queensland
<b>Colour</b>	Light Grey (N35)
<b>Area</b>	1200m <sup>2</sup>
<b>Installer</b>	The Epoxy Coating Specialists

### COMMENTS

- The existing epoxy coating had been worn down and needed to be replaced.
- To prepare the heavily contaminated 1200m<sup>2</sup> workshop area, a high-pressure hot water rotary clean was administered and followed up with a diamond grind.
- Selection of the Kevlar®-reinforced Jaxxon 1525 was made due to its excellent wear and impact resistance. Two coats of were then applied by roller.
