

Case History

PROJECT SUMMARY

Client	Brew Cafe
Location	Brisbane City, Queensland
Colour	Custom
Area	170m ²
Installer	Floorchef

COMMENTS

- Resin Marble™ was chosen in a custom metal grey to replace the original flooring, which had slowly deteriorated into a health and safety hazard. The aim was to maintain the edgy feel of the trendy eating spot while delivering a durable, easy-to-clean finish.
- Installation had to be completed within a 4-day window so service could resume in time for the busy weekend. The original floor was in poor condition, suffering from extensive damage and cracking that required significant repair before another flooring could be applied.
- A clear non-slip topcoat was applied for easier maintenance and safer footing in the event of spills or splashes.
