PROJECT SUMMARY

Client	Private Residence
Location	Ephraim Island, Queensland
Colour	Custom Basalt
Area	80m ²
Installer	Floorchef

COMMENTS

- The owner of this large garage on the Gold Coast initially enquired about a flake design, however after showing them the capabilities of metallic flooring a more eye-catching finish - perfect for the luxurious surroundings - was chosen.
- A completely seamless, showroom-like finish was desired, so the control joints in the slab were filled during surface preparation to make this possible.
- A polyurethane topcoat was applied over the top to protect the garage entry from UV and maintain a consistent level of gloss across the entire area.

"I'm happy to refer them to anyone. Just tell them to give me a call!"

- Riccardo Rizzi, Homeowner
