<b>Location</b>	Albany Creek, Queensland
<b>Colour</b>	Ash
<b>Area</b>	35m <sup>2</sup>
<b>Installer</b>	Clean and Coat

### COMMENTS

- Like most residential garages, the old, uncovered concrete had been heavily contaminated by dirt, oil and grease and the owner was desperate to rejuvenate the dull and dreary space.
- While the slab was dirty and had to be treated for surface cracking, it was otherwise in sound condition and the Resin Vinyl system was able to be installed without the need to prime first.
- The owner was blown away by the transformation and couldn't believe the difference the glossy, colourful finish made to the look of the entire house.

*"It's made a huge difference...I can't believe it's the same garage!  
The work was done quickly and I hardly knew they were there."*

- Suzie, Homeowner
